IF YOU DISCOVER OR SUSPECT A FIRE

Leave the room shutting the door behind you.

Operate the fire alarm using the nearest available call point.

**ON HEARING THE ALARM**

Leave the building **IMMEDIATELY**.

Proceed to the assembly point at:-

**Do not stop to collect personal belongings.**

**Do not re-enter the building.**

## IMPORTANT

Before you go to bed make sure you know the means of escape in case of fire and know how and where to operate the fire alarm and how to call the Fire Brigade.

Always ensure that doors across corridors and between corridors and staircases are kept closed, particularly at night. They are provided for your protection from fire.

What would you do in a  
hotel emergency?

1

**When you enter your room, review the escape plan.**

If you must escape through smoke, get low and go under the smoke to your exit.

2

**Use the stairs - never use elevators during a fire.**

Keep your room key by your bed and take it with you if there is a fire. If the alarm sounds, leave right away, closing all doors behind you.

3

**Take the time to find the exits and count the number of doors** between your room and the exit. Make sure the exits are unlocked. If they are locked, report it to management right away.
